

# Motor control module MS01

This compact module is inserted as a link to connect an axle control with digital outputs and

## Features

- easy mounting (top-hat rail)
- compatible with uniaxial positioning control MA90/91; digital PLC outputs
- continuously variable quick/creep motion
- pulse width modulation (PWM)
- power max. 70 W

Feature	Technical data	Additional information
Supply voltage	16 ... 24 V DC	adjusted, with polarity protection
Motor current	max. 3 A	max. 6 A peak
PWM	continuously variable 0 – 100%	soft start
Inputs	galvanically isolated	optocoupler 24 V / approx. 10 mA
Temperature range	0 ... +50 °C
